WHOLE NO 79.

VOL. IV-NO. I.

SAN FRANCISCO, SATURDAY, OCTOBER,4 1856

Off Barnegat.

How does she head now?" cried the captain, in a deep stentorian bass.

He was a tall, powerful man, who stood braced He was a tall, powerful man, who stood braced on the quarter-deck, while every body else was lashed fast. Four men were at the wheel, and even then they could hardly steer the ship. A hurricane, blowing dead on shore, had surprised them, just before day-break; and in the midst of it a look-out had cried, in those words that are never heard at such times without a thrill of horror, "Breakers ahead!"

Instantly the helm was ordered hard down, and it was then that the content spoke.

instantly the neim was ordered hard down, and it was then that the captain spoke "How does she head now?" he said. The answer was undistinguishable except to the practised ears of the speaker, and it was far from satisfying him, for he thundered in reply, "Harder—harder!"

"Harder—harder.\"
The gallant ship, staggering under a close reefed mainsail and double reefed fore-top-sail, with just enough of her jib set to give her steerage way, plunged heavily into a tremendous wave, throwing the water, crackling and hissing, far above the yard-arm; while the giant billow, rolling landward, broke into foam close under the lee.

The captain waited an instant and then demanded again.

ed again, "How does she head?" The answer was still unsatisfactory. "Harder !"

"Ay! ay! sir."
"Harder yet!"

"Harder yet.1"
"She is chock up, sir!"
"She'll never stand it," said the mate, looking up "She must stand it," replied the captain, " or we

Close to the master's side, securely lashed, was his only son, a child about eight years old. The little fellow had been eagerly watching his father's countenance in the grey twilight, and he now

"Are we going to be lost, father?"

For a moment, that bronzed face, which had hitherto gazed unmoved at the near prospect of death, quivered; but the stout seaman rallied immediately.

mediately.
"I don't know, my son," he said. "But you must be a brave boy and he ready for the worst. It would be better for you, you know, to die now, than grow up a bad man."

swept the child from his footing and away into the boiling sea to leeward. For a moment, the parent boung sea to teeward. For a moment the parent thought that his boy was gone forever. But the lashings, instead of having parted, had only become partially unwound, and, after letting out for some twenty feet, brought the child up. The returning surge bore him inward. It was all the work of a moment.

The father seized the lad, and casting loose nings, then calmly stepped to the cabin "Steward," he cried, "put dry clothes on the boy,

and bring him on deck again.' In a few minutes the boy re-appeared. In a few minutes the boy re-appeared. The father re-lashed him, more securely than before; but had he been a woman, he could not have done it with more tenderness; and it was in this only that his great love for the child was shown. The little fellow caught manliness from the calm looks of his parent, and never again, through the trials that followed, felt, or at least exhibited, alarm.

All this while, and for hours after, the gale raged. Continally the master thought his ship would go ashore in spite of all. The peril of wreck became the more imminent, because, after delaying it until the mast strained frightfully, he had to order the mainsail in and close-reef the fore-top-sail; and under this rag of canvass it seemed almost impossible to claw off the treacherous coast. What emotions agitated the captain's heart, as he gave the reluctant order, who shall tell? Doubtless he thought of his wife, with her babe at

Doubless he thought of his wife, with her babe at the breast, praying in the cabin, and of his little son, whose silent heroism affected him more than noisy terrors would; but of himself we may be certain he did not think at all. He stood, all this time, bracing himself, his feet wide apart, while ev-erybody was lashed, now scanning the mast that bent almost like a whip-stalk, now asking, with hand to mouth, "How does she head?" and how hand to mouth, "How does she head?" and now sternly gazing at the white breakers, that leaped, and snarled, and howled impatiently under the lee.

Overhead, the grey scud drifted swiftly westward; the hurricane shrieked and roared; and the fore-top-mast jerked and struggled in the wilder gusts of the gale, as if it would snap asunder. Now a gigantic wave, striking the ship on the weather bow, would make her, for an instant, pause, while, very timber in her would quiver; and the bulk-heads would groan as if she was a living creature in agony; then she would be swept sensibly to leeward; and next the fragments of the billow would pour in over her deck, rage its whole length like a pack of hungry wolves, and finally leap sullenly over the bulwarks or rush headlong through the skuppers, as the gallant craft, rising to

leap sullenly over the bulwarks or rush headlong through the skuppers, as the gallant craft, rising to windward, shook off her foes. Now another wave would approach, towering and towering as if about to submerge the doomed ship, when suddenly the buoyant craft, meeting it with the helm, would shoot up its glistening side, and the spent surge would roll, in a sheet of foam, landward, disappearing, the next moment in the breakers.

The morning dawned, but brought no relief. On the contrary, the bleak shore, the wild surf, and the wrecks strewed along the treacherous sauds, increased the sad forebodings of all. The men, with ghastly faces, surveyed the prospect, and those who had never prayed before, prayed dow. Yet still the captain stood, calm and stern, giving his orders; and still also, close beside him, his heroic little son took courage from his countenance.

"Ay !" answered the master, at last fi "Thank God !" and that was all he looked at his boy, and a big tear can which he brushed away with t

New Haven. The Boston Dispatch, says of the New Haven

This grand firemans display, which takes place on the 4th, 5th and 6th of September, promises to be a most brilliant affair. Among the many crack engines which are to be present, we have heard of Engines Nos. 3 and 12, of Brooklyn, N. Y.; (No. 12 is a large Hunneman) No. 11, of Lowell; Niagara Engine Co., of Providence, R. I., (independent) with a new engine from Jeffer's manufactory. The Exempt Eugine Company, of New York, was ex-pected to signify their intention to be present, but at a meeting held a few evenings since it was voted not to attend, in consequence of the near approach of the parade of the New York Fire Department, in which they intend to participate. The assemblage of firemen on those three days, will of course be immense. A large number from this and sur-rounding cities, intend to be present, and among that number will probably be seen Chief Engineer Smith, of our fire department, Chief Engineer Train, of Roxbury, and others. We shall endeav-or to give our readers a good report of the doings, and shall expect to note some of the greatest play-

ing ever heard of in this country.

Since writing the above we find the following in a Chicago paper: —We learn with pleasure that Niagara Company No. 3, intend visiting New Haven at the grand trial of engines on the 5th of September. They take their fine machine with them, and if they use her there as well as they have here, they will show the New Havenites some tall playing. Our firemen will undoubtedly find foemen worthy their steel, and brother firemen who are not backward in the rites of hospitality. In relation to the same subject the New York

Mercury has the following from a correspondent : parade of the New Haven Fire Department, are now nearly complete, and they are such as will give the most entire satisfaction to all who will participate. One thousand invitations have been sent to different parts of the country, and it is conselled. The arrangements for the second grand triennial rent parts of the country, and it is generally expected that one tenth part of them will be resonded to in the shape of visiting companies; we shall have one hundred companies, who with their bands of music, will make a sight sel-dom seen in this or any other city. All visiting ompanies that can possibly make it convenient, hould arrive here on Thursday, the 4th instant, as Friday, the 5th, has been set apart to parade and play for the prizes. The first is \$500, the second, \$200, and the third \$100. Companies who do not arrive until that day will be apt to delay those ararrive until that day will be apt to delay those arrangements, unless it is at an early hour in the morning, The procession will form at 10 o'clock, A. M. You will, perhaps, remember the company that visited New York from Chicago some time since; a committee from the same have been here and engaged quarters, and promise to astonish the natives, not only by their seven stream engine, but by bringing one (as they say) of the best hose companies in the Union. As you say, stick a pin there. All who honor New Haven with their presence will e assured of being entertained on as liberal a scale be assured of being entertained on as liberal a scale as the circumstances will permit, owing to the great number of companies that will be present. I hope New York will be well represented. The first prize should start out them smart engines in the lower districts. Our firemen would be highly pleased to see the Exempt Company here with their large and powerful engine. Phenix Engine Co No 5. have sent a special invitation to Phenix Co. No. 5. have sent a special invitation to Phenix Engine Company Co. No. 12, of Brooklyn. If the Brooklyn boys come, they will find themselves at home among the members of No. 5. Other companies of this city have sent special invitations, which have been accepted. Relief Engine Co. No. 3, will not take part in the parade, for reasons that the parade, the reasons that the parade of the parade. best known to themselves. They are, I learn, about to purchase for themselves an engine, which

s building in this city, and run as an independent company, which will be after the plan of your Ex-Franklin Engine Co. No. 3, and Phenix Engine Co. No. 12, of Brooklyn, N. Y., have each chartered a steamboat, and will visit New Haven on the th proximo, to contest for the prizes offered for he apparatus which do the best execution.

IN A TIGHT Fix.—At a fire in McDougal, street, New York on Thursday evening Aug. 28th, Engine company No., 11, had their pipe in the fifth story of a tenement building, when the hose burst and left the member with the pipe alone in a front room, while the foreman went below to have the damaged length replaced. In a minute the flames broke out with intense fury from the adjoining apartment cutting off all retreat by the stairs, and leaving the man with but little breathing space in the dense smoke that poured out of the windows. The building was on the rear of the lot, where it was impossible to get a ladder, and the case seemed rather despelate. Some of No. 11's members succeeded in getting into the room directly below the one where their companion was confined, and by standing on the outside of the window sill, their shoulders formed a support for him, and he lowered In a Tight Fix.—At a fire in McDougal, street, standing on the outside of the window sill. their shoulders formed a support for him, and he lowered himself from the window above. They then held fast to his feet, and allowed him to slide down between them until he reached the sill where they stood. The gentleman in question may congratulate himself on a narrow escape when in rather a tight for

destroyed by fre, on the 11th July. It covered two acres of ground, and consisted of five distinct ranges of buildings. Kearly 1000 pianos, in va-rious stages of construction, were burned, with rious stages of construction, were burned, with valuable materials, and the tools belonging to 420 workmen. The property destroyed is valued at from \$500,000 to \$700,000.

The utility of firemen being musicians is shown in the above; had the firemen of London been competent to play upon those pianos, such an en-

DGE MASS .- The "Fireman's lot," in th

Letter from Philadelphia.

PHILADELPHIA, SEPT. 4th 1850. FRIEND BORUCK .- We are having a lively time here amongst the Firemen in consequence of the near approach of the election for Engineers, which held on Monday the 8th inst, when the companies in the Department will have an opportunity of electing their own engineers, which has heretofore been done by the Councils. There are some dozen candidates in the field, all of whom, have issued circulars setting forth their several claims in the most earnest and patriotic manner, and declaring their undying love and attachment to the interest of the Firemen. The contest how-ever, seems to be narrowing down to three candidates, viz. Shoemaker, the present Chief, who is supported by all the County companies; Wm. A. Thorpe of the Perseverance Co., and S. P. Fearon of the Schuylkill Hose, each of whom according to the statements of their friends, are sure of to the statements of their figures, are sure of being elected. Two of them however, are doomed to be disappointed. We have had quite a number of fires lately, but none of any importance, with the exception of one on Sunday night, the 2d inst., which destroyed the Commonwealth Hotel stables, at Seventh and Callowhill streets. A few skirmishes have taken place between some of the mishes have taken place between some of the companies just admitted into the Department by the folly of councils and some one or two of the old companies. They amounted to little more than loud words, which has been magnified by some of the paid Fire Department Journals to terrible riots. The Board of Delegates to the Fire association met on Monday evening Sept. 1st., and organized by electing Peter Fritz President, Marshall Henszey Vice President, Daniel R. Murphy Treasurer, John Neff Secretary; the only change in the officers being the election of Henszey as Vice President, in place of Samuel Floyd. The affairs of the Association are in a flourishing condition, their losses by the large fires in the early part of the year, being much less than was reported. The prospect of a handsome dividend to the companies for the next year is altogether flattering. I send you a report of the Chief engineer, also a list of the candidates for Engineers at the ensuing election.

Military matters which have been at a stand still some time back are likely to take a fresh start; the ball was set in motion in the 1st, Brigade 1st., Division P. V., on Tuesday last when an election was held for Colonel of the 1st Regiment Infanty to fill a vacancy. The contest was quite animated, the candidates being Wm. D. Lewis jf. and Gen. Guards, Capt Lyle; Independent Greys, Capt. Braceland, Independent Guards, Capt. Cromley, and was of course elected by a large majority. The only companies supporting Fritz, being the Washington Blues, Capt. Goslin and the German Washington Guards, Capt Wagner. Lewis had more majority than Fritz had votes, and more votes in the National Guards alone, than Fritz had altogether. together. The only company that polled more votes than they can, or Washington Blues, who polled every man for Fritz, who they have heretofore bitterly opposed. The only reason for their doing so is said to be the mimosity of their captain against the National Guards, in which Company he was formerly a Lieut but was beaten at the last election, when he re-signed and took command of the Blues. The next military excitement will be the laying of the "corner stone" of the new Armory, about to be erected by the National Guards, Capt. Lyle, which is to take place on the 17th inst., being the 69th, anniversary of the adoption of the constitution of the United States Invitations have been extended to the several corps attached to the 1st Brigade, to parade on the occasion. Gen. Cadwalader has been invi-ted to preside and Peter Mc Call Esq ex-mayor, has consented to deliver the address. The occasion will no doubt be a proud one for the Guards;—their undertaking being the first of the kind ever attempted in this Division. The building is to be of brick and iron, three stories high. The first or brick and fron, three stores and offices, the se-cond as a concert and lecture room, and the third, as an armory. The building will be 46 feet on Race st., by 130 feet to Cressons st., upon which it has a front of 40 feet, making it 40 by 130 feet. I had prepared a list of the several companies composing the 1st Brigade but I have concluded to withhold it until my next to see what changes (if any) will be made in the 1st. Regiment Infantry by Col Lewis.

IN A NICE POSITION .- There are two papers published in the city of New York, which devote a portion of their columns to Fire Department affairs. The journals are the New York Mercury and the Sunday Leader, and both are opposed to the present Chief Engineer of the fire department, Alfed Carson, and between them, he has a very nice time. One hits him a "hit," on his annual report, and before he recovers his equilibrium, the other hits him a "dig," on his opposition to the new Fire ordinance. Cathering himself up, and partially recovering from the effect of the last, another takes him under the "lug," for praising up the new men of the department, and giving the old ones the go by. After setting that matter all right, as he thinks; he gets a sockdologer, for not procuring music in time for the parade of the fire en; and so it goes from one to the other. While one paper tells him that they hope his annual report for 1856, will be the last he will ever sign; the other comes in with the consoling information that a new candidate is coming up for the Chief Engiership, who will knock "spots" off of him; and thus it is. Verily the office of Chief Engineer of the New York Fire Department must be a bed of

INE COMPANY 41.—This Company turned trly on Sunday morning August 24, to test appa ratus, at the foot of Houston street New The whole company was arrested by the

An Account of a Recent Trial at the Old Baily, in London, Lord Chief Justice Tindale, presiding.

George Hammond, a portrait painter, was placed to the bar, to be tried on an indictment, found against himself by the Grand Jury, for the wilful murder, with malice aforethought, of George Baldwin, a rope dancer and mountebank. The prisoner was a man of medium height but slender form.
His eyes were blue and mild. His whole bearing gave evidence of subdued sadness and melancholy resignation. He was forty-one years of age, had a soft voice, and his appearance and manner bore evidence of his being a man of distinguished edu-

cation, in spite of the poverty of his dress.

On being called on to plead, the prisoner admitted that he did kill Baldwin, and he deplored the act, adding, however, that on his soul and conscience, he did not believe himself guilty. Thereupon a jury was empanelled to try the prisoner. The indictment was then read to the jury, and the act of killing being admitted the government rested their case, and the prisoner was called upon for his defence

The prisoner then addressed himself to the cour

and jury:—

"My Lord, said he, my justification is to be found
in a recital of the facts. Three years ago I lost a
daughter, then four years of age, the sole memorial of a beloved wife, whom it had pleased God to re-call to himself. I lost her but I did not see her die. She disappeared—she was stolen from me.— She was a charming child, and beside her I had nobody in the world to love me. Gentlemen, what I have suffered cannot be described; you cannot comprehend it. I had expended in advertising aud fruitless searches everything I possessed—furniture, pictures, even to my clothes. All have been sold.

For three years on foot, I had been seeking for my child in all the cities and all the villages in the three kingdoms. As soon as by painting portraits I had succeeded in gaining a little money, I returned to London to recommence my advertisments in the newspapers. At length, on Friday, the 14th of April last, I crossed the Smithfield market. In the center of the market a troupe of montebanks were performing their feats. Among them was a child turning on its head, supported on a halbred.

A ray from the soul of its mother must have penetrated my own, for me to have recognized my child in that condition. It was my poor child. Her towards her, and locked herself in her arms. As for me, a veil passed over my eyes. I knew not how it was-I, habitually gentle, even to weakness, seized him by the clothes-I raised him in the air, then dashed him to the ground—then again; he was dead. Afterwards, I repented what I had done. At the moment, I regretted that I was able to kill but one." Lord Chief Justice Tindale.—"These are not christian sentiments. How can you expect the ourt and jury to look with favor on your defence,

or God to pardon you, if you connot forgive."

Prisoner.—"I know, my Lord, what will be your judgment, and that of the jury; but God has la-ready pardoned me; I feel it in my heart. You know not, I knew not then, the whole extent of the evil that man had done. When some compassionate people brought me my daughter in prison, she was no longer my child; she was no longer pure and angelic as formerly; she was corrupt, body and soul; her manner, language, infamous like those with whom she had been living I did not recognize her myself. Do you comprehend me now? That man had robbed me of the love and soul of my child. And I—I have killed him but

Foreman,-"My Lord, we have agreed on our

Chief Justice.—"I understand you, gentlemen. but the law must have its course. I must sum up the case, and then you will retire to deliberate." The Chief Justice having summed up the case, the jury retired, and in an instant after returned into court with a verdict of "Not guilty."
On the discharge of Hammond, the Sheriff

obliged to surround him with an escort. The women were determined to carry him off in triumph. The crowd followed him all the way to his lodgings

Philadelphia.

with deafening shouts of huzzas.

Weare indebted to Robert B. Quayle, Esq., for a copy of the fifth quarterly report of the Chief Engineer of the Philadelphia Fire Department. From it w learn that the number of fires that have occurred in the quarter ending June 30th, is 70; the estimate loss on which is \$985,110, and the insurance \$696,925, leaving an uninsurred loss of \$288,185. The increase of fires as compared with the preceding quarter is twelve, the increase in total loss, \$864.848, and the increase in uninsured loss, is \$223,185.

The Department consists of 39 engines, 29 hose and 5 hook and ladder companies; possessing 43 engines, 61 hose carriages, 6 trucks, 54,528 feet of hose, and 835 feet of ladders.

Honorary members, 2,265; / active members, 3,075; contributing members, 2,211. Total number of members, 6,551. FRANKLIN'S FIRST APPEARANCE IN A PRINTING

Oreice.—When quite a youth Franklin went to London, entered an office and enquired if he could get employment as a printer.
"Where are you from?" inquired the fore

"America," was the reply.
"Ah," said the foreman, "from America! a lac
from America seeking employment as a printer
Well, do you really understand the art of printing Well, do you reany
Can you set type?

Franklin stepped to one of the cases, and very brief space of time set up the following passage from the first chapter of the Gospel by

Mobile.

There has been considerable excitement amongs the Firemen of Mobile, a contest for supremacy having come off there on the 7th August. Our correspondent from that city sends us the follow-

EDITOR FIREMAN'S JOURNAL :- The long looked or trial of power between the different engines composing the Fire Department of this city, and which has been in contemplation some time, as was xpected, drew a large crowd to the wharf yesterday, in spite of the rain, which fell for several min-utes during and previous to the contest. The prizes, a flag each for first and second class engines, put up by the Chief Engineer and his Assistants, were won by Torrent 5, and Franklin No. 3. The place selected for the contest was St. Louis street wharf. The conditions were-each engine to draw its own water and play through two lengths (100 feet) of hose, and through any sized nozzle not less than seven-eights of an inch, they chose. The following is the order and measurement of the dif-

the Chief Engineer.

No. 1 labored under considerable disadvantage rowing against the wind. No. 8 broke down on the first trial but on the second trial made the above mentioned distance.

The first stream thrown by No. 6 was claimed by her members to have exceeded that of No. 5, but in the absence of the judges at the two ends it was decided as no go. A good deal of interest was manifested by all present—but the best feeling prevailed throughout. A good deal of betting was going on previous to the trial—juleps, however, having preference to

The Franklin, No. 3, is a Ludlam engine, built in 1852. The judges classed the engines in the following manner: All cylinders nine inch and under, 2d class; ten inch and over, 1st class. Nos. 1 and 2 being Philadelphia engines, No. 6 a Button engine, No. 5 a Jeffer's. No. 4, have their new engine, built by James Smith of New York, but not being in good working order they used their old

engine by the same builder Since the above was written Nos. 5 and 6 have had another trial for a silver trumpet, to cost not less than one hundred dollars. They both threw a stream of water 194 feet, or so nearly alike it was decided a tie. They had another trial, when No. 5 played 198 feet and No. 6, 183 feet; quite satisfactory to both parties. The trumpet is ordered from

RIGHT.—The Patterson N. J. Guardian, of Aug 26th, has the following:

The splendid rooms of Columbian Hose Co., No. 1. fitted up in a style of magnificence seldom surpassed, at a great expense to the members, have been totally cleaned out, the company throwing up their machine on the account of the expulsion o one of their members by the Common council. The foreman of this Co, Griffith King Esq, is favorably known to all of our citizens. He is a good fireman and well calculated to govern a company well. His loss to the Fire Department we pany well. His loss to the Fire Department we particularly regret. That the members of the company "threw up" is also generally regretted. As a whole they were respected very much. If there were any black sheep in the flock, the officers did not know it. But as they like to be true to their friends, the rest of the company grew indignant when one of their company grew indignant when the co mant when one of their company was condemned without a hearing. They did net know who might be singled out for disgrace next, and for their own safety say they considered it best to resign at once The furniture is all removed from their room-even their wall cornice carried off-and the scene of desolation is complete where a few days since all was elegance and comfort.

We think that company acted just right, for we have not the slightest doubt but that the expulsion of the member alluded to, was solely on political grounds. Every Fire Department throughout the Union should endeavor to free itself from the rule of Common Councilmen, otherwise political influence of the most degraded character, will be brougt to bear upon its members.

THE ENGINEER BOARD.—The Engineer Board of THE ENGINEER BOARD.—The Engineer Board of the New York Fire Department met on Tuesday August 26th, and decided that the Engineers should take rank according to their term of service as Engineers, and in case of any two having served a like term in the Board, that the question of service, as firemen. By it Mr. Cregier ranks No. 1., Mr. Howard No. 2. Messrs. Baulch, Decker and Cornwell, No's 3 4 and 5; according to the time they have served as firemen; Mr. Kingsthe time they have served as firemen; Mr. King land, No. 6, Mr. Farnham No. 7, Mr. Mawby No. Messrs. West, Newman and Jacobs, No's. 9, 1 department; and meaning and 18 in like manner.

On Gas!.—The Manchester Mirror of 3d. says: The Fire companies of Lowell are making The Fire companies of Lowell are making a rangments to send a delegation to the Fireman Muster at New Haven, Ot. The Lowell Advertise of Wednesday says: "The Firemen selected fix the several fire companies of this city, as delegated the Fireman's Muster at New Haven Commade a trial of Water Witch Engine No. 11, 1 evening and threw a stream 286 feet.

Making every allowance, for produ limate, excitement of the members, &c., the en WATER.—The daily supply of water for York city, is 50,000,000 of gallons.

Wit and Sentiment.

"Get up, get up," said a watchman the other night, to a chap who had taken a grade below the door-step sleepers, and who had taken lodgment in the gutter; "you musn't lie here." "Lie! you're another!—y-you lie yourself! Not lie here! I tell you w-what, old fellow, that may do in them slave states, but I'll let you know said the fellow throwing a handful of mud in the watchman's face, that this is a "free state."

Too much fancy is not necessary in our conversa-tion or writings; it begets vain and puerile ideas, which tend neither to make us wise nor better. Our thoughts should be produced by good sense and right reason, and ought always to be the effect of our judgement.

It was a proverb among the Greeks that a flat-terer who lifts you up to the clouds has the same motive as the Eagle when he raises the tortoise into the air; he wishes to gain something by your

Andrew Jackson was once making a stump speech out West, in a small village: Just as he was concluding, Amos Kendall, who sat behind him whispered, "Tip 'em a little Latin, General. They won't be contented without it." The man of the iron will instantly thought upon the few phrases he knew, and in a voice of thunder wound up his speech by exclaming—"E pluribus unum—sine qua non—ne plus ultra—multum in parvo." The effect was tremendous, and the "Hoosier's" shouts could be heard for miles off.

An editor out West, in speaking of a concemporary, says he uses such dirty language, that when he calls at a decent person's house, he should forget his boots and apply the scraper to his tongue. If you hear of a duel "out West," between the edtors of the Morning Bowie Knife and the Clarion of Democracy, don't be surprised.

To please every body, all that's necessary is to accommodate every body. If Jones wants a loan of ten dollars, let him have it, and Jones will speak well of you till you ask him for it again. How it will be after that, we shall not venture to say. Why is an actor like a chimney? Because his

worth depends on the way he draws. They are particular in Schenectady. A boy was arrested on Monday for spitting in the canal.

MARCUS D. BORUCK, Editor

SAN FRANCISCO SATURDAY MORNING, OCT. 4. 1856

THE FIREMAN'S JOURNAL AND MILITARY GAZETTE. IS PUBLISHED EVERY SATURDAY MORNING.

At No. 72 Merchant Street, up-stairs.

It will be regularly served to subscribers in San Francisco every Saturday morning at an early hour, for FIFTY CENTS per month, payable to the

carriers.
Subscribers will be furnished by mail for five dol.
lars a year, payable in advance. Two copies sent to one address for eight dollars.

Persons in the city who wish the paper left at their residences, will be served on leaving their names at the publication office.

Advertisements end advertising notices inserted New York prices.

The FIREMAN'S JOURNAL is for sale on the day of its publication, and for a week thereafter, by
J. W. Sullivan, Washington street, near Post Office, Mr. Ullman & Co-, Post Office Arcace,

Geo. H. Leland & Co., Post Office Arcade, Doran & Merriam, 1751 Clay street

With this number, we begin the fourth volume of the Fireman's Journal. We merely notice the fact as custom demands it. We are thankful to our friends, for the support they have given us for the nest: and shall endeavor to merit a continuance of their favor. The Journal is a permanent institution of the country, and will ever be found, to be the true friend and exponent of the Firemen

of the city of San Francisco and of the State. To the Millitary we are under obligations, for their liberal patronage and shall always be gratified to advocate their cause and andvance their pros-

C. K. Garrison.

As is usually the case upon the arrival of the steamer, with news from the Atlantic States, the most important items are given publicity long before the steamer bringing them is made fast to her wharf. At the first flush, those items of whatever nature they may be, are big with import until the papers are sent ashore, and the anxious looker for information on reading their columns, becomes disgusted at the insignficance, of what at first from rumor, he supposed to be gigantic, Such was the case when the John L Stephens arrived on Monday last, when it was announced from the deck that C. K. Garrison, Esq., ex-mayor of the city had been arrested, on the day previous to the sailing of the steamer, at the suit of Cornelius Vanderbilt, the charge being fraud to the amount of \$500,000. upon which he was compelled to give bail in the sum of \$150,000; Charles Morgan Esq., being his surety. When the papers came ashore however and the community had time to read and deliberate; a perusal of the account, ended with an involuntary "pshaw," at the ridiculousness of the charge made against Mr. Garrison, particularly when the principal party interested came back to California, with the passport which had been handed W. L. Chrysler. by the New York Press.

We have positive information that the day before Mr. Garrison's arrest, he dined with Cornelius Vanderbuilt; when overtures of a business arrangethe next day the suit was commenced, for the purpose of injuring Mr. Garrison here. Proceedings were not had until so short a time before the sailing of the steamer, that Mr. G. would not have the opportunity to refute anything which might be said against him. In that particular however, his opponents overshot their mark. A defence here in his favor was not necessary, as his character for honesty and probity, among his fellow men, was too well established; and therefore when the news of his difficulties did reach here, it made not the slightest impression detrimental to him. The whole prosecution lies in a "nut shell," and is divided into two parts: First, an attempt to levy black mail: Second, to impede the progress of the new line of steamers, which Mr. Garrison is now forming for the purpose of benefitting the people of this State.

All the business between Mr. Garrison and the parties who are now prosecuting him, was settled on this side in March, and in New York, in April. After having relations of a character which involved three or four millions of dollars; with the exception of an account of three thousand dollars. and that was a matter very easily disposed of at any time; and had his representatives but paid certain parties here, \$5000 black mail; or had the Banking house of which Mr. G. is the head, given them credit to the amount of \$10,000, there would have been no such thing as a prosecution for fraud

or anything else.

Mr. Garrison is now engaged in superintending the construction of two splendid steamers for his new line. He may rest assured that he has not lost a friend, by the course which has been taken inst him, but on the contrary made accessions of a gratifying nature, and we very much mistake his character if he does not turn the tide, to a ortifying extent against those who are engaged in

THE HOOKS AND LADDERS.—We are informed that he members of St. Francis, 1, Lafayette, 2, and ne, 8, intend to unite upon a nominee from heir companies, upon whom they can concentrat heir entire vote for Assistant Eugineer.

me they feel (and very justly hat they are entitled to a representative in the loard of Engineers; and by nominating a good man, and competent fireman, they will be enabled o secure a sufficient number of votes from the engine companies to elect him. We are inclined to the opinion that their position will be favorably viewed by the Fire Department.

MUSTER.—The idea of a Fire er, to take place in this city, is well received remen here. What say our friends in Sacramento and Stockton, and through-ate? We think it is somewhat premaintended for San Francisco, reach here. It ple generally, should get up prizes for the to play for. It is done in almost every city in the Union, and why should it not be done

Fire Coroner.

Since the establishment of this paper we have ndeavored to have procured the appointment of an Inspector of Buildings, for the purpose of preserving, if possible, not only the lives of the firenen, but the people at large. When the law governing the Fire Department was amended by the Board of Delegates, and the salaries of other officials in the organization were reduced, the salary of the Chief Engineer was retained at \$5000 per nnum : but further and more important duties were imposed upon him. He was authorized to have the Superintendence of the erection of all buildings, and was empowered to investigate the causes of all fires, take testimony under oath, and if the same could be traced to the act of an incendiary, to bring the guilty parties to justice. The Law which contained this useful provision, did not go into force, for the reason (as the community is already aware) that the Governor, from feelings best known to himself, vetoed it. That an Inspec for of Buildings should be appointed none can for moment doubt, as the insecure buildings which are being constructed from day to day, give evidence. Had there been such an officer, invested with the proper authority, the buildings on Ohio and Stockton streets would not have been erected. There are now, in various portions of the city, buildings which should not be allowed to stand, for the time will come when a serious fire takes place they will be found to be nothing more nor less than coffins for the firemen. Avarice gives way to all feeling of thought or consideration, and the desire to speculate, and make money, even though it be at the risk of life and limb, takes precedence of all else. In the city of New York the Fire Wardens prepare lists of all unsafe buildings erected in their districts, and those lists are placed in the most conspicuous place in every engine, hose and truck house. The same system should be established here; otherwise, on some windy night, when a fire is raging, the cry of unsafe walls" will have as great an effect on the firemen as "powder," and they will leave the suspected locality to its fate, only directing their efforts to the safety of the surrounding property; and no consideration but the saving of life will induce them to return.

St. Francis H. & L. Co., No. 1. Mr. George W. Gibbs, ex-foreman of St. Franis Hook and Ladder Company, No. 1, who has been absent in the Atlantic States for the past six months, returned in the John L. Stephens on Mon. day, bringing with him some costly presents for the officers and members of the St. Francis company. To each of the officers he presented a splendid 32 cone fire cap made in Gratacap's best style. The fronts are of solid silver, neatly chased, surmounted with a gold Hook and Ladder Truck The rank, name of the officer and company in lethave ever seen, and display a richness of taste unsurpassed. The three caps cost two hundred and they were brought before the Police Judge yester seventy-five dollars. To the company, to the number of sixty-five, Mr. Gibbs presented each with a new cap front, beautifully stitched. The ground of Department, for the Fire Wardens. As Judge blue patent leather, and the letters of white patent Baker was not acquainted with the facts of the leather; the names of the men on red patent leather, in silver letters. The whole cost of the fronts | few minutes before the case was called) he asked amounting to three hundred and twenty-five dol-

Fire Department. On Wednesday evening, after ment until this morning at 10 o'clock. the regular meeting of the company, the members NEW ENGINE House.—From the Marysville Exproceeded to the residence of Mr. Gibbs at the press we take the following:

Oriental Hotel, and with a full band serenaded that

Vesterday morning, in com gentleman and his family, ending the same with a grand display of fire-works. On Monday evening last, the second of a series of soirces, which the St. Francis company are giving, took place at their Truck House on Dupont street. Among those present were the French Consul, P. Dillon and lady, and the officers of the French Frigate Alcibiade,

n full uniform.

ELECTIONS .- We think it would be well for the udiciary Committee to report upon some new me. thod of electing officers of the Department. The Assistant Engineers should not be elected at the same time with the Chief. The reasons are obvious. A man with the highest merit as a fireman and an executive office: may be running in opposition, to one without the slightest claim to preference on the part of the firemen, but yet by man gement, and transfer of votes from this or that Assistant, and vica versa, from himself to them. his election may be secured. The time has arrived when the officers of the Fire Department should be elected solely on their merits and their ability to perform the duties imposed upon them, and by that neans we will attain a permanency and prosperity cond to none in the world. We do not desire to terfere with the arrangements of the present election," but let the law of the Department be changed to meet the election for 1358. Say for in. tance, let the Chief elected on the first Monday of December 1857, serve for the full term, and the Assistants until May 4th, at which time let an election be held for Assistant Engineers to hold the

osition for one year. To CORRESPONDENTS .- To those of our friends and orrespondents, who send us the result of engine rials we make the request, that they will upon all ccasions, furnish us with the name, style and builder of the engine, length of suction drafted through, or whether and how supplied. The length of hose played through-size of nozzle and the length of ime consumed in playing on each trial—through the pipe or butt, together with the size of cylinders and capacity; length of stroke and number of men; all of which information should accompany statement giving an account of an engine trial.

AT LAST.—Two cisterns are to be constructe in the Seventh ward, each capable of containing 34,000 gallons of water. One to be constructed a ne corner of Mission and Second, and the other a corner of Mission and Third streets. We will be perfectly satisfied if these cisterns are built with the same care as that lately constructed at the corner of Stockton and Pacific streets, by D. T. Van Orden.

SPECIAL ORDER.—The appeal cases of John P Corrigan, and L. R. Townsend, expelled from Knickerbocker Engine Co. 5; Elcan Heydenfeld ricken from the roll of Howard Engine Co. No. 8 nd Louis Toeplitz, expelled from Crescent Engl Company, No. 10; have been made the special der of business for Wednesday evening next.

Metropolitan Theatre last evening by the Cir-Company, was a splendid affair. The house

VOLUNTEER 7.—This Company is now running a relief engine; as their own engine is undergoing of Pennsylvania, 12's company, in citizens' dress repairs at the shop of Mesars. Brooks & Bonny.

Matilda Heron.

We learn from Porter's Spirit of the Times, that an infamous scamp by the name of Dr. John H. Gihon, who figured so largely in connection with that "book of books," the Annals of San Francisco, has been the agent of Miss Matilda Heron for some time past; travelling with her in Europe and in the Atlantic States, managing her affairs, Not meeting her views and sentiments to have him longer attached to her, and feeling that she would not be successful under his regime; Miss Heron very properly dismissed him from her service. The coward for the purpose of gaining revenge, saw fit. in public places and bar rooms, to villify and abuse the lady in a shameful manner, seeking St Louis, (the favorite city of Miss Heron) as the depot from whence his venom should emanate. This coming to the knowledge of Miss H., she hastened to St Louis; and through the Press, addressed a letter to Gihon, replete with those sentiments which a virtuous woman can only utter, setting forth her wrongs, couched in language which to our ideas, add new lustre to her already brilliant reputation So truthfully were her injuries depicted in that letter (and we regret we have not space to publish it entire) that the slanderer was forced to retract, and receive back to himself, the slime with which he attempted to impede her path. The impression made upon the feelings of the people was of such character, that all classes of the citizens of St Louis extended their unbounded sympathis and support to Miss Heron. Whilst in this city and in the State, Miss Heron bore an unblemished reputation, and never was suspicion breathed against her. Her career as an actress was an unprecedented one; and when she left here for the Atlantic States, it was with the sincere and deep regret of many friends, who appreciated her character as a woman, and her talents as an actress. It gives us great pleasure to have it in our power to bear this testimony to her worth and abilities.

Fires and Alarms for the Week.

Oct 2d 1 1-2 P. M .- Alarm from Monuments Bell. Chimney in brick building of J. C. Eddy & Co., at the corner of Sansome and Commercial Sts. No damage. Portion of the Department out .-Knickerbocker 5 in service.

Oct. 3d, 3 1-2 P. M .- Alarm from Monumenta Bell. Chimney in St. Francis Hotel, corner of Clay and Dupont streets. No damage. Portion of the Department out. No. 6 and St. Francis. H and L., in service.

Insecure Buildings.

In last Saturday's issue we called attention to the insecurity of a brick building which was being erected on Ohio street. The Press without exception (and the Firemen are under obligations to them for their kindness) noticed the circumstance and condemned the builders of the structure. The Fire Wardens, endeavored to stop the progress of the ers of gold. These caps are the most elegant we | building, but their orders being disregarded, a warrant was issued for the arrest of the parties, and day morning. Judge Baker appeared for John Baily the defendant, and the Secretary of the Fire case, (he having been employed as council, but a that the case be postponed until Monday or Tuesamounting to three hundred and twenty-ne dollars. Mr. Gibbs was for three years foreman of St. Francis Co., and enjoyed an unbounded popularity, not only in his own company, but in the entire case of fire. The case was postponed by agree-time and went to the quarter pole in thirty-seven seconds, with all that advantage. On the back stretch and went to the quarter pole in thirty-seven seconds, with all that advantage. On the back stretch are the ground of the great danger of the building in the ground of the great danger of the building in the ground of the great danger of the building in the ground of the great danger of the building in the ground of the great danger of the building in the quarter pole in thirty-seven seconds, with all that advantage. gineer Ball, we visited the new Engine House on

cil. It is two stories high, with a belfry, is beau-tifully finished, and has all the conveniencies that are required. The rooms are large, and every has been done in the very best manner. There is not a better or more commodious Engine House in the State. One thing in connection with it is, that it has been completed within the estimate, and no bills for extra work will be brought The work reflects much credit on Mr. Miller, Architect and Contractor, and the manner and conveniences, on Mr. Ball, the capable and energetic Chief Engineer. This last named gentleman has been particularly careful to see that every thing that was needed should be supplied, and not only so but in the very best manner. The Yuba Engine Co. and the Salamander Hook & Ladder Company are the fortunate occupants of the new building.

MISS MARY PROVOST .- Among the passengers by the John L. Stephens, we are pleased to welcome back again our old friend Charley King, well known to all our old theatre goers. Mr. King is accompanied by Miss Mary Provost, said to be a very accomplished and agreeable actress, late from the leading theatres of New York city. She is represented as possessing considerable talent in both Tragedy and Comedy, and in every way capable of taking leading parts, and is withal of very prepossessing appearance.

We learn Miss Provost commences an engage ment at the Metropolitan sometime during the coming week.

EDMOND PILLETT .- A complimentary benefit to Mr. Pillett, tendered by the society of California Pioneers, takes place at the American Theater on Wednesday evening next.

PIONEER CIRCUS. The Pioneer Circus Company, under the management of Messrs. Rowe & Smith, will open at the Union Theater on Commercial St.. on Monday or Tuesday week. The company is a most excellent one, in fact the very best that has ever visited this State.

MRS. JULIA DEAN HAYNE.—This estimable lady and excellent actress will commence an engage ment at the Metropolitan Theater, on or about the 20th inst. Her re-appearance will be hailed with delight by her numerous admirers.

Source.-We acknowledge the receipt of an invitation to the Soiree at Mme. McGregor's Dancing Academy, Philharmonic Hall, corner of Jackso and Stockton streets.

THE MINSTREIS. - The Minstrels are do thriving business, drawing crowded houses nightly. JOHN TORRENCE. Has a benefit to-night at the Metropolitan Theatre, tendered him by the Nation-

al Circus Company. Ir You PLEASE.—Members of the Fire Department, receiving from their friends at home, information, either by letters or papers, of matters interesting to the organization, are requested, as a particular favor, to communicate the same to us. We shall always feel grateful for such kindne

ering 43 men, visited the Circus on Saturday ng last. Pacific, 8, and Crescent, 10, in com-on Monday evening, numbering respectively,

The Turf.

Union Course-Pacing.-The race on Tuesday st over this course, between Daniel Webster and red Johnson was numerously attended.

Young America being considered out of condition was drawn just before the start took place. The track was in good order, and there being little o no wind stirring, it will be seen by the following immary that the horses made most excellent time Tuesday Sept. 30th, 1856.—A purse of \$150, with an inside stake of \$100 cach, and added—half forfeit—to wagons. Mile heats, best three in ve—to rule:

H Shear entered g g, Fred Johnson. 2 1 1 2 1
Daniels entered g g, Daniel Webster. . . 1 2 2 1 5
Rogers entered, b g Young America. . 0 pd forf.
Time. . . . 3 20 1 2 — 2 31 — 2 33 — 2 35 — 2 43.

UNION COURSE, L. I. TROTTING. The Best Time on Record-2 24 1-2, in Harness The Best Time on Record—2 24 1-2, in Harness
Another contest between those celebrated nags,
Flora Temple and Tacony, came off on the above
named course, Sept. 2d, for a stake of \$1,000.—
The distance was mile heats; Flora Temple in harness and Tacony under the saddle. The race was
won by Flora Temple in one heat, which she performed in the unprecedented time of 2 24 1-2, distancing Tacony. This time is one second less
than ever before made, either under the saddle or
in harness.

The race weil contested throughout.

Tacony, down the backstretch and to the half nile pole, went at a prodigious rate, evidently fasthere than the mare was going—the gait must have been somewhere in the neighborhood of 2 24 or less. If this had been continued without a break up, it would have been difficult for the mare to have beaten him in 2 24 1-2—the time in which the heat was performed. At the rate at which Tacony went just previous to breaking, his rider had not the power o retain the horse on his centre of gravity. occurred in both instances, and both bad. It is this power of preserving the equilibrium in the horse that constitutes the skill of the rider and driver, and for which Hiram Woodruff is so deservedly celebrated.

The attendance was rather slim, when we cons'der the celebrity of the horses, owing, no doubt to the absence of sporting men from the city and the approaching Presidential election. The weather, however, was everything that could be asked, and the drive out to the course was truly delightful. The trotting track, however, was not all that could have been desired, being rather dry and dusty to our mind, and did not compare favorably with it condition on some other occasions. Some persons owever, thought it just the thing, and they may have been right. Time is the proper test.

Tacony, ridden by Warren Peabody, was the first to appear on track, and as he jogged around, previous to thematch, he looked uncommonly well, we thought, and capable of making as good time, as on ny former occasion. He is a fine specimen of the American trotting horse, very muscular, and open gaited, and, in fact, possessed every requisite of the trotter. His rider as he jogged along seemed much at ease, and very confident of success, notwithstanding the extraordinary creature against

whom he had to contend. Flora shortly afterwards made her appearance in narness, driven by her favorite driver, Hiram Woodruff, who declared after the race that she could beat a locomotive. She looked well, as sh appeared throughout the summer, extremely well and jogged around the track as gaily as a cricket. Her friends were much pleased with her, and were ready to back her to any extent, 100 to 30 being current just before the start. She is a universa favorite, and since the days of Lady Suffoik no nag has stood higher in the estimation of sporting men than Flora Temple. They believe her invincible, and her race on Tuesday seems to justify that be

THE RACE.
Flora Temple won the inside position, and at the cond attempt went off with the lead. She open ed a gap of three or four lengths on the upper turn 1:13. The mare now increased her speed, and car-ried Tacony to a break, from which he did not recover readily. Hiram perceiving the distance Ta-cony was behind, now tried to shut him out entireand make surety doubly sure. The pace Third street, and can, with pleasure, say that it is an ornament to the city and an honor to the country associating, and she reached home from the half-mile pole in one min ute and eleven and a half seconds! making the entire heat in 2:24\frac{1}{2}. After Tacony recovered from his first break, he made a gallant attempt the mare, which resulted in another bad break on the home stretch, from which he could not recover in time to save his distance. And so ended this long to be remembered trot of Flora Temple and

acony.

The following is a summary:— Tuesday, Sept. 2.—Trotting match, \$1,000, mile H. Woodruff named b. m. Flora Temple..... W. Peabody named r. g. Tacony.....dis.

Time, 2:241.

DEATH OF TRUSTEE .- This distinguished horse died at the farm of Henry Booth, Esq., at Morrisa-nia, Westchester county, N. Y., on the morning of Tuesday last. Trustee was foaled in 1829, and bred by Mr. Ridsdale; he was got by Catton, out of Emma by Whisker, grandam Gibside Fairy by Hermes -Vicissitude by Pipator-Beatrice by Sir Peter-Pyrrha by Matchem-Duchess by Whitenose-Miss Slamerkin by Young True Blue—Lord Oxford's Dun Arabian, out of the D'Arcy black-legged Royal mare. Trustee was imported into New York in 1835, and afterwards became the sire of the re-nowned Fashion and the celebrated trotting horse Trustee; also of Ann Stevens, America, Darling, Henry Martin, Revenue, Carlotta, Djalma Livingston, Nero, Walking Wilson, Dan Henrie John Black, Tom Redd, Buford, Reube, Hiddle stone, La Reine, Logan, May Fly, and hosts of oth-

KNICKERBOCKER, No. 5 .- This Company have lately added some new and unique decorations to their engine room. The pendants to their chande liers are really beautiful, and show considerable heauty and design,

DELEGATES .- The different companies in the Fire Department are called upon to elect two delegates to the Board of Delegates for the ensuing year, at their regular meetings next week. The newly elected delegates take their seats on the evening of the second Wednesday in November.

THANKS .- To our friends J. W. Lees, Californi No. 4, and J. H. Shepard, of Columbian No. 11, for interesting papers received by the last steamer J. W. SULLIVAN.—Has our acknowledgments for

AND FIREMAN'S JOURNAL.

SAN FRANCISCO SATURDAY MORNING, OCT. 4TH, 1856.

Marion Rifles.

This Company of citizen soldiery has been thoroughly re-organized, upon a basis which gives token of great prosperity to the corps. The roll is composed of some of our very best citizens, quick to respond to the call of duty upon all occasions. An election for officers was held on Thursday evening last with the following result :-Captain, E. A. Rigg, First Lieutenant, J. W. Stillman Second Lieutenant, John W. May, Quarter-Master Sergeant, L. F. Zantzinger Orderly, E. B. Zabriskie Second Sergeant,J. W. McCormick

Third Sergeant, J. M. Davis, Fourth Sergeant, M. H. Ablenfeld Second Corporal,.....James Wilmer, FIRST LIGHT DRAGOONS .- This Company is now in a most presperous condition. At the last meet-

ing thirty-two new members were added to the Roll. The Dragoons now number eighty-five splendidly equipped men.

Young AMERICA GUARDS.—The regular drill nights of this company are Wednesday's and Sat-

THE RACE.—The following is a summary of the time made at the foot-race in the Circus, last night, the occasion of No. 11's benefit: Mr. Garrett. Pacific, 8...... 2 min., 21 sec.

CAUTION TO THE PUBLIC.

A CHALLENGE!

WHEREAS, A CERTAIN DAGUERREOTYP HEREAS, A CERTAIN DAGUERRECTYPTHOU IST of this city has advertised that he takes the
only genuine Ambrovers in this city, and that all others
are socus, we amounce this a grose misrepresentation,
and an attempt to swindle the public. Mr GEO. McKOWN, of our firm, was putting up Ambrotypes by this
alleged patented process, at Mr Root's establishment in
Philadelphia, long before a glass picture was taken in California; but, as it was soon found out it invariably destroyed the picture, it was repudiated. We can show any
person, in a few minutes, by calling at our rooms, the truth
of this statement.

\$200 CHALLENGE! To be left to scientific men, that our pictures are put up better, look better, and will last longer. We are not compelled to buy expensive and magnificent frames to show off our minatures—they speak for them-AND. MIND YOU, we only charge a little more than ONE-HALF the price. This dear public have got to pay for these magnificent frames, and high rent and expenses; we do our own work, and our expenses are triling, comparatively speaking.

ELECTRO CHEMICAL BATHS.

The recent discovery of a really wonderful and most beneficent method of applying electricity for the removal from the human system. I Mercury in all its forms, iron, a'nc, lead, antimony, arsenic, quinine, and all other metals, minerals and insidious drugs and the consequent speedy cure of Paralysis. Rheumatisms. Stiff Joints. Painter's Colte and Lame Wrist, Indolent Ulcers, Jaundice, Fever and Ague, Diseased Liver, Diseased Kidneys, The Doloreux, and all Nervous Affections, Is termed as above. The cure is almost immediate. These Baths produce the most gratifying and delightful sensations without shock or disgreeable disturbance of the system. Those who have been without hope fer months or years—those who are "neither deed nor alive"—those who feel cold and torpid—those who know they are 'full of mercury." Iron, and wish to have it "tiken out" of them—all all—will take these Electro-Chemical Baths. The Ladies will find them of inestimable value, as in removing diseased conditions, they render the skin clear, soft and amoother. A convectent lady will attend to them.

DR BOURNE, Water Cure Physician, corner Sansome and Commercial streets, opposite St. Nictolas Hotel, has just imported and arranged the FIRST and ONLY apparatus for administering these delightful Baths, and is now prepared to employ them in all cases of Paralysis, Stiff Joints, Rheumatism, Ferer and Ague, (only one Bath is said to be requisite,) Jaundice, Neuralgia, etc. etc.

PIONEER WATER CURE INSTITUE, Southeast Corner of Sansome and Commercial Streets, opposite the St. Nicholas Hotel, San Francisco

DR. BOURNE.

Water Cure Physician,

Having every facility for the scientific administration of Water Treatment, offers the advantages of this natural, rational, and most efficacious mode of curing diseases to invalids, in either acute or chronic stages of suffering, and especially to those laboring under the

RUINOUS EFFECTS OF CALOMEL, and Brug treatment generally.

There are no nauseous or poisonous medicines to swallow or pay for, as DR. BOURNE does not administer any whatever, nor bleed, cup or leech; so it is not only the REST but CHEAPEST System for restoration of health.

For In Chronic or Acute Rheumatism, Diarrhos, Dyspepsia, Fever and Ague. Isthmus Fever, ALL Nervous and Bexual disorders—in fact, in all cases, the WATER CURE is of UNEQUALLED VALUE.

Bexual disorder:—in fact, in all cases, the WATER CURE is of UNEQUALLED VALUE.

Apply personally, or address by letter, as above Office hours—10 A M, to 1 P M, and after 7 P M.

"P A R T I C U L A R. N O T I C E.

The "Russlan," Digger Indian! Turkish, or Egyptian "Steam Baths,"—the invention of barbaric minds,—with all their to Weak Lungs. Palpitating Hearts, and debilitated Digestive and Nutritive Organs, are NOT Water Cure, and bear no more resemblance to that glorious system than does a horse to a red herring, notwithstanding all the false representations to that effect DR BOURNE is the Pioneer and only Water Cure Physician on the Pacific Coast, and is daily demonstrating his skill in his art with the highest success—curing those whom the medical fraternity had placed almost beyond the confines of hope; such being the general character of the cases demanding and receiving relief at his hands. Let them continue to come and be HEALED, and converted to this wiser and better way.

MISCELLANEOUS.

LOOK OUT FOR THEM!

DON'T BE HUMBUGGED!!

The paying your money for worther track called patent ambrotypes, which are being salmed off on the rubble as imperiments. There works are scaled patent ambrotypes the pictures are scaled with Baleam, which constantly come out, and so on leaves the picture covered with blaten, and it is ruised. For the truth of this, examine closely specimens, (and the small ones particularly,) in a certain extraordinary fine show case in town, and see for yourselves. WE tried scaling Ambrotypes long ago, and had some twenty or thirty specimens at the door, but, one by one they have become ruised, and now only one remains of the original lot.

By the improved method of putting up Ambrotypes, the coment is entirely done away with, and the picture is covered with an enamel which instantly dries and becomes as hard as the glas lised!. This is the improvement, and the pictures are called IMPROVED AMBROTYES throughout the United States, and houset operators make no other. These pictures were first introduced in California by Pord, and he still makes them in unequalled perfiction.

Having received by the last steamer a Mammoth sized (AMETA, Mr Ford is prepared to execute LIFE SIZE Ambrotypes and Potographs.

Particular attention is paid to the Photographic Views on paper.

Orders for these will be attended to from any part of the

paper. Orders for these will be attended to from any part of the Orders for these will be attended to from any part of the city and surrounding country.

UNION BILLIARD SALOON, UNION HOTEL. Fronting on the Plaza.

This Room, having been fitted up in a style of taste and egance unequalled in California, IS NOW OPEN TO THE PUBLIC. The TABLES—six in number—from the manufactory of Messrs Strahle & Brother, in accuracy of movement and beautiful workmanship, challenge comparison from Bastern manufactories. Among the valuable improvements introduced in their construction, is one which, prevents the chalk from accumulating in the pockets, thereby keeping Tables always clean and in order. Au ingenious addition is also made to the legs of the Tables, by means of which the beds are kept in a perfectly level position.

The favor of the lovers of the quiet and genteel game of Billiards, is solicited.

FISK'S PATENT METALLIC BURIAL CASES And Corpse Preservers.

And Corpse Preservors,

We have received the right of sale of Fisk's Paten Metallic Burial Cases, and are prepared to furnish them to Undertakers and others at a small advance upon cost price in the Atlantic States. The advantages claimed by the use of Fisk's Patent Metallic Coffins for preserving the dead, over all others now in use, are: First, that they no cessarily cost very little over the price charged for coffin made of the ordinary woods, and that the manner of using them is as simple that any person can do so by following the directions which accompany each Case; and, lastly, because they arrawe the purposes they were originally intended or designed for, vis: the preservation of the human body from decomposition after death; so that it cam be forwarded to any part of the world with safety, allowing sufficient time to gratify surviving friends who may be absent, and thereby enabling them to take the last fond look of the dead, without offending the most delicate or resistive. We have witnessed the preservative properties of these Coffins a number of times in cases where it become accessary to convey the corpus to a distance, and sever, in a single instance haze we known them to fail in all that has been claimed for them. Being periodly airtight, the body once placed in them retains its natural appearance, without disturbing or disfouring it in the least, and will remain as for a number of years if proper cars it takes so as to prevent the case from getting broke. And we further state that it is only necessary to give from a grain in order to satisfy the most skeption!

JAMES GALLAGHER, Undertakers and General 'unmishers, Jy12-3m 161 Secremen o street, San Francisco.

Hats! Caps! Hats!

BRADSHAW &)

TO ANY ONE WHO CAN PRODUCE AS good an AMPROTYPE PICTURE as we are making no matter in what part of the world it was made. R. H. VANCE, PATENT AMBROTYPES

Corner of Sacramento and Montgomery streets To those who wish semething New and BEAUTIVIL:—We have purchased the Patent Right of CUTTING AMBROTYPES for this State, and are now prepared to take them in a style unequalled in the United States, of any size from the smallest minature to life size. I hereby denounce all Pictures taken on Glass in this city or State, and called Ambrotypes, as nous, and a fraud upon the public being a miserable imitation of the genuine article. I would say to all whe have been deceived and swindled with Bogus Pictures, not to condemn this new and beautiful invention until they have seen the GENUINE AMBROTYPES. They are said to be the most durable Picture known, as neither acids, water, or dampuess of any kind, can affect them. Those having Daguer-rectypes which they wish to preserve FOREVER, would dowell to have them copied in Ambrotype.

Great attention will be paid to GROUPING. Groups 'rom 2 to 30 can be made perfect. Persons can now be taken with Regaliss, Military or Fireman dress, without naving the insigniss or letters reversed.

We attill continue to executeour splendid Premium Da-

ond.
We still continue to executeour splendid Premium Da-guerreotypes as usual. Having made great and extensive additions to our Gallery, for the purpose of making and exhibiting our Ambrotype Pictures, we would be pleased to have our work examined. Our Gallery is FREE to all,

SEA BATHS! SEA BATHS! ON MEIGGS' WHARF.

Russian Steam Baths and Mineral Baths,
ON MEIGGS' WHARF,
THE FIRST AND ONLY COLD AND WARM
SALT WATER BATHS, on the Pacific Coast, are now opened to the public in the beautiful large building on Meiggs' Wharf, North Beach. The construction of the natural Sea Water Baths surpasses every establishment of this kind. It affords not only the fullest security, but excludes the disagreeable draughts of the winds, and leaves full action of the waves, which is the principal necessity of sea bathing; thus rendering the privilege of the ocean not only to the strong, but also to the feeble. The Warm Sea Baths are constructed in the finest possible style, and every Bath furnished with a strong douche, so desirable to produce a rection of the ckins. Both Baths are highly recommended to invalids suffering with colds, rheumatism, chronic diseases and those calamities which a change of climate inflicts upon the human system. The Russian Steam Bath, long renowned in the world as the only sure specific against colds is put up with the greatest convenience and the newest improvements, and this with the strong power-douche of Sea Water, renders it preferable to every other construction in this branch. Using Fresh Water for douche often increases the cold, and adds new pains to those felt before applying steam.

Ladies and Gentifimen patronising us will find neatly furnished pariors, where every attention will offer every facility and convenience or artival, and the pictureque situation will render the trip the more pleasant. Invalled from shed rooms, commanding a fine view, are kept solely for our patrons. Skillful Physicians and faithful servants will attend those who seek relief in our establishment. To respond to every call we furnish Sdishur and other Mineral Baths for a speedy and complete cure.

To keep pace with the times, and to deserve attention and the putrousge of the public, we charge the lowest possible prices.

The great utility of this enterprise as well as the advantages offered by the proprietors, will convince ever

and the patronage of the yearle, which prices.

The great stillity of this enterprise as well as the advantages offered by the proprietors, will convince every body that it should be sustained for the good of mankind. Therefore, Ladies and Geulemen of San Francisco, and othe State of California, give us your favor and patronise the SEA BATHS of DR. BRUNS & CO., jy12 5m Melgge Wharf, North Beach, MRS. PLUMMER,

MEDICAL.

Valuable Family Medicines.

THE CELEBRATED GERMAN TONIC AND AROMATIC BITTERS. AN INFALLIBLE REMEDY FOR JAUN-DICE, INDIGESTION DASSERSAL DICE, INDIGESTION, DYSPEPSIA, IMPURI-TIES OF THE BLOOD, &c., &c., and an Elegant. Salubrious and Wonderful Restorative in all DISEASES OF THE STOMACH and DIGESTIVE ORGANS.

Virtues of the German Bitters.

In all diseases of the Stomach and Digestive Organs, the German Tonic and Aromatic Bitters iurpass any medicine that has ever been devised. By a peculiar process of German chemistry, they possess the power of warming and invigorating the functions of the Stomach while they diminish the faverish sensibility of the nerves and fibre.

They fortify and strengthen a weak stomach, and quickly discipate all unpleasant pains and symptoms. They calm spasmodic action; restore the lost appetite; promote digestion; and, in a word, remove, with astoniching power, all the disorders occasioned by we kness and debility, provided the patient be not afflicted with indissoluble organic obstructions Virtues of the German Bitters. obstructions
These Bitters are highly esteemed in the West Indies
of southern part of the United States for nourishing and
vigorating the nervous system and acting as a general
storative on debilitated constitutions, arising from bilious

restorative on debilitated constitutions, arising from bilious complaints contracted in warm climates.

They are pre-eminently efficacious in all inward wastings, loss of appetite, indigestion, depression of spirite, trembling or shaking of the hands or limbs, and sil consumptive habits. They purify the blood, case the most unpleasant sensations in the stomach, and promote general warmth and perspiration. They are delighfully aromatic to the taste and smell; agreeably stimulating and stringent in their action on the fibres of the stomach, giving that proper tension and activity to these delicate organs which good dig-stion requires.
